Acute Toxicity

LD50, oral: 3310 mg/kg (rat)

LD50, dermal: not determined

LC50, inhalation: > 16 mg/l (rat)

Primary effects

Irritant effect on skin: Causes chemical burns to skin and mucous membrane.

Irritant effect on eyes: Causes severe chemical burns.

Inhalation: No information available.

Ingestion: No information available

Sensitization: No sensitizing effects known.

Mutagenicity: No data available.

Reproductive toxicity: No information available.

Carcinogenicity: No data available.

Teratogenicity: No information available.

Specific target organ toxicity (STOT): No data available.

Additional toxicological information:

Inhalation can cause chemical burns and a resorptive toxic effect. The inhalation of high concentrations of acetic acid vapors can cause laryngitis, tracheitis and bronchitis, and in extreme cases an obstructing pulmonary edema.

After skin contact, a brown corrosion scab is mostly formed.

Due to its good lipid solubility it is rapidly penetrated by the skin with depth effect.

The data is based on the undiluted 100 % preparation.

Not applicable.

12.6. Other Adverse Effects

Water hazard class:

1, slightly hazardous

Behaviour in sewage systems:

Further ecological effects:

Rinse off of bigger amounts into drains or aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms.

The pH-value is reduced significantly when the used product is diluted, so that the waste water which might enter the sewage system is only slightly hazardous to water.

Do not let product enter waterways or sewage system.

The data is based on the undiluted 100 % preparation.
